

Soilborne Disease Master Class

Interested in what soilborne diseases are and how to manage them for your vegetable or onion crops?

Learn about managing soilborne disease in vegetable and onion crops

Participants will hear from leading scientists and growers on the new developments in soilborne disease and integrated soilborne disease management.

Working together, participants will then apply learnings to vegetable and onion growing systems.

This **2-DAY MASTER CLASS** is aimed at vegetable growers, onion growers and agronomists.
