

NSW Vegetable Innovation Day

Friday 13 December | The Demonstration Farm

Join us for our Sweet Corn and Zucchini Variety Field Day, where we will showcase the newest varieties of sweet corn and zucchinis.

Learn how to implement Integrated Pest and Disease Management practices on your farm, and dive into soil health and sustainable practices.

Event highlights:

- Explore new varieties of sweet corn and zucchini tailored for improved yield and disease resistance
- Discover alternative biological and chemical control options for Fall Armyworm and other pests and diseases
- Learn about innovative soil management practices and the benefits of incorporating green waste amendments
- See the latest advancements in irrigation management and water use efficiency
- Learn about the alternatives to polyethylene plastic mulches, including biodegradable plastic mulches.

This event is ideal for vegetable growers, agronomists and industry professionals seeking to expand their knowledge and improve their growing practices while showcasing new innovation and technology.
